

Rapid Wireless Connectivity Promotion

Deploy high-performance business internet in as little as five business days while ensuring operational continuity through reliable wireless failover connectivity.

Limited time only.

Offer ends 31 August 2026. [T&C's apply.](#)

Reliable Connectivity for Time-Sensitive Business Environments

MTN Tarana Rapid Connect provides businesses with fast, dependable wireless internet deployment when traditional fibre timelines are not immediately achievable.

Whether supporting office relocations, retail launches, temporary operational sites, or continuity planning strategies, Rapid Connect enables businesses to establish connectivity quickly while maintaining flexibility for future fibre integration.

Once fibre services become available, Tarana can seamlessly transition into a dedicated business continuity and failover solution, helping minimise operational disruption during outages or service interruptions.

Designed for a Range of Business Environments

Office Relocations

Establish business connectivity quickly during office moves or infrastructure transitions.

Retail and Hospitality

Enable operational readiness for new stores, restaurants, cafes, etc. With the option to transition to failover thereafter.

Project sites

Support construction sites and operational facilities requiring dependable internet access.

Fibre Delays

Maintain operational continuity while awaiting permanent fibre installation.

Business Continuity

Ensure uninterrupted operations through reliable failover internet connectivity.

Business Connectivity Built for Agility and Continuity

Rapid Deployment

Businesses can be connected in as little as five business days*, significantly reducing operational downtime and deployment delays.

Reliable Managed Wireless Infrastructure

Delivered via Layer 3 managed wireless internet architecture, providing stable and professionally managed business connectivity.

Business Continuity and Failover Capability

Tarana integrates seamlessly into dual-WAN business environments, enabling automatic failover functionality should primary fibre services become unavailable. Contact your account manager to discuss network expansion options.

Uncapped and Unshaped Access

Support operational efficiency with unrestricted internet access designed to accommodate business demands without shaping limitations.

Included WiFi Hardware

A free-to-use Zyxel WiFi Router is included to support rapid deployment and simplified setup requirements.

Limited-Time Rapid Connect Promotion

Deploy reliable business connectivity faster while reducing upfront infrastructure costs with the MTN Tarana Rapid Connect promotional offering.
