# Purpose-Built Connectivity for Modern Business Operations

Today's businesses require connectivity solutions that deliver stability, scalability, and operational confidence. This Fibre Promotion has been designed to support organisations seeking dependable internet connectivity with enhanced deployment efficiencies and reduced upfront investment.

Leveraging Active Ethernet Technology, RSAWEB provides dedicated fibre infrastructure suitable for a broad range of business environments, from growing SME's to Enterprise-grade operations requiring higher SLA commitments and advanced network flexibility.

This promotion is exclusively available within select Multi-tenanted building (MTB), helping accelerate deployment timelines through pre-approved building access and existing infrastructure readiness. Please speak to your account manager to see if you qualify.

# Why Choose RSAWEB Business Fibre Connectivity

## Dedicated Business Fibre Infrastructure

Built on Active Ethernet Technology, providing stable, business-grade connectivity designed for operational reliability and performance consistency.

## Reduced Upfront Costs

Take advantage of promotional savings with waived setup costs and first month free. This allows businesses to deploy high-quality connectivity without significant initial expenditure.

## Predictable Commercial Planning

Fixed pricing throughout the full contract term provides financial certainty and protects businesses from unexpected mid-contract price increases.

## Faster Deployment in MTB Buildings

Eligible buildings benefit from pre-approved landlord access and existing infrastructure pathways, helping streamline installation processes and accelerate delivery timelines.

# Compare Our Business Fibre Solutions

Choose the connectivity solution best suited to your operational requirements, performance expectations, and scalability needs.

From enterprise-grade connectivity with proactive monitoring to cost-effective dedicated access, RSAWEB offers flexible Active Ethernet solutions tailored for modern business environments.
